

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT
FOR THE SUPPRESSION OF PINEAPPLE MEALYBUG IN PINEAPPLES**

PERMIT NUMBER - 81900

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 17 DECEMBER 2016 TO 30 SEPTEMBER 2022.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Person generally.

CONDITIONS OF USE

Product to be used:

MOVENTO 240 SC INSECTICIDE (APVMA No. 61864)

Containing: 240g/L SPIROTETRAMAT as the only active constituent.

Directions for Use:

Crop	Pest	Rate
Pineapples	Pineapple Mealybug (<i>Dysmicoccus brevipes</i>) Suppression only	750 mL/ha Plus Hasten Spray adjuvant at 50mL/100L of spray mixture.

Critical Use Comments:

- Apply by foliar application using calibrated boom sprayer.
- Apply a spray volume of 1000L/ha. Ensure adequate penetration and coverage.
- Apply during periods of active vegetative and/or root growth.
- Apply with a minimum re-treatment interval of 14 days.
- DO NOT apply more than 2 treatments per crop.
- DO NOT apply consecutive applications of Spirotetramat.
- DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby crops/plants, cropping lands or pastures. Refer to product label for spray drift restraints.
- Apply in accordance with the Resistance Management Strategy. To avoid the development of resistance, the product should be rotated with other approved insecticides from different chemical (MoA) groups.

Withholding Period:

Harvest: DO NOT harvest for 14 day after application.

Grazing: Nil.

Jurisdiction:

QLD and NT only.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

TO AVOID CROP DAMAGE:

The sensitivity of crops to be treated under this permit has not been fully evaluated. Therefore, it is advisable to only treat a small number of plants to ascertain their reaction before treating the whole crop.

Export of produce:

To allow treated produce to be supplied or otherwise made available for human consumption, a Temporary Maximum Residue Limit (TMRL) has been established for Spirotetramat in Pineapple. MRLs can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard)*. This TMRL applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: 9 July 2019 – Permit holder updated. Reference to spray drift restraints added. Other non-technical changes made to improve clarity. Expiry date extended to 30 September 2022. Issued as version 2.
