

PERMIT TO ALLOW EMERGENCY USE OF AN AGVET CHEMICAL PRODUCT

FOR CONTROL OF SILVERLEAF WHITEFLY IN GREEN BEANS

PERMIT NUMBER – PER85103

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 12 SEPTEMBER 2017 TO 30 SEPTEMBER 2022

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

NUFARM NUPRID 350SC INSECTICIDE (60587)
PLUS OTHER REGISTERED SEED TREATMENT PRODUCTS
Containing: 350 g/L IMIDACLOPRID as their only active constituent.

Directions for Use:

Crop Type	Pest Insect	Application Rate
GREEN BEANS	Silverleaf whitefly (<i>Bemisia tabaci</i>)	14 mL product / 100 m row

Critical Use Comments:

- Apply one (1) in-furrow treatment only using calibrated boom sprayer or similar equipment.
- Apply to open furrow not earlier than 5 days prior to planting, as a narrow band of spray centered under the plant row.
- Apply in at least 2 L water per 100 m row.
- DO NOT apply more than one (1) soil application of imidacloprid to each crop.
- DO NOT use imidacloprid, or any other Group 4A insecticide as a foliar spray to that crop following the soil application.
- DO NOT use imidacloprid again or any other Group 4A insecticide as a foliar spray to that crop following the soil application.

Withholding Periods:

Harvest: Not required when used as directed.

Grazing: DO NOT graze or cut for stock food within 6 WEEKS after application.

Jurisdiction:

QLD only.

Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the DETAILS and CONDITIONS of this permit.

Export of treated produce

To allow treated produce to be supplied or otherwise made available for human consumption a Temporary Maximum Residue Limit (TMRL) has been established for Imidacloprid in Common bean (pods and/or immature seeds) at T1 mg/kg. This TMRL applies only to produce marketed and consumed in Australia. If imidacloprid treated produce is to be exported, due account should be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Version 2 issued: 4th July 2019. Expiry date extended to 30th September 2022.
