

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT  
FOR THE CONTROL OF PINEAPPLE MEALYBUG IN PINEAPPLES**

**PERMIT NUMBER - 81901**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 24 AUGUST 2016 TO 28 FEBRUARY 2023.**

**Permit Holder:**

HORTICULTURE INNOVATION AUSTRALIA LTD  
Level 8, 1 Chifley Square  
SYDNEY NSW 2000

**Persons who can use the product under this permit:**

Person generally.

## CONDITIONS OF USE

### Product to be used:

TRANSFORM INSECTICIDE (APVMA No. 64101)

Containing: 240g/L SULFOXAFLOR as the only active constituent.

### Directions for Use:

Crop	Pest	Rate
Pineapples	Pineapple Mealybug ( <i>Dysmicoccus brevipes</i> )	400 mL/ha

### Critical Use Comments:

- Apply by foliar application using calibrated boom sprayer.
- Apply a spray volume of 1000L/ha. Ensure adequate penetration and coverage.
- Addition of Agral or Nufarm Chemwet 1000 according to the label directions may improve control.
- Apply during periods of active vegetative and/or root growth.
- Apply with a minimum re-treatment interval of 14 days.
- DO NOT apply more than 2 treatments per crop.
- DO NOT apply consecutive applications of Transform Insecticide.
- Apply in accordance with the Resistance Management Strategy. To avoid the development of resistance, the product should be rotated with other approved insecticides from different chemical (MoA) groups.
- Highly toxic to bees. DO NOT apply product while bees are foraging in the crop.
- Refer to 'Spray Drift Restraints' and 'Mandatory No-Spray Zones' statements on the product label.

### Withholding Period:

Harvest: DO NOT harvest for 14 day after application.

Grazing: Not required when used as directed.

### Jurisdiction:

QLD and NT only.

### Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

### TO AVOID CROP DAMAGE:

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable to only treat a small number of plants to ascertain their reaction before treating the whole crop.

### EXPORT OF PRODUCE:

To allow treated produce to be supplied or otherwise made available for human consumption a Temporary Maximum Residue Limit (TMRL) has been established for sulfoxaflor covering the

commodity Pineapple at T0.1 mg/kg. This TMRL applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should be taken of the residue definition and residue limits/import tolerances of importing countries; any residues must not exceed those requirements of the importing country.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: 30/01/2019 – Permit holder changed to Horticulture Innovation Australia Ltd. Expiry extended to 28 February 2023. Reference to label statements on protection of bees, spray drift and no-spray zones added. Permit issued as Version 2.
