**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET
CHEMICAL PRODUCT FOR THE CONTROL OF CARPOPHILUS BEETLE IN
CHERRIES**

PERMIT NUMBER - 82062

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 19 NOVEMBER 2015 TO 31 DECEMBER 2023.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LIMITED
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

HUILONG BIFENTHRIN 80 SC INSECTICIDE (APVMA No. 67140).

PLUS OTHER REGISTERED PRODUCTS

Containing: 80 g/L BIFENTHRIN as the only active constituent.

TALSTAR 100 EC INSECTICIDE/MITICIDE (APVMA No. 45704).

PLUS OTHER REGISTERED PRODUCTS

Containing: 100 g/L BIFENTHRIN as the only active constituent.

VENOM 240 SC INSECTICIDE (APVMA No. 81526).

PLUS OTHER REGISTERED PRODUCTS

Containing: 240 g/L BIFENTHRIN as the only active constituent.

TALSTAR 250 EC INSECTICIDE/MITICIDE (APVMA No. 60987).

PLUS OTHER REGISTERED PRODUCTS

Containing: 250 g/L BIFENTHRIN as the only active constituent.

IMTRADE BIFENTHRIN ULTRA 300 EC INSECTICIDE (APVMA No. 65676).

PLUS OTHER REGISTERED PRODUCTS

Containing: 300 g/L BIFENTHRIN as the only active constituent.

Directions for Use:

Crop	Pest	Rate
CHERRIES	CARPOPHILUS BEETLE (<i>Carpophilus davidsoni</i> , <i>C. mutilatus</i> and <i>C. hemipterus</i>)	<p><u>80 g/L product:</u> 62.5 mL/100L</p> <p><u>100g/L product:</u> 50ml/100L</p> <p><u>240 g/L product:</u> 21 mL/100L</p> <p><u>250 g/L product:</u> 20 mL/100L</p> <p><u>300 g/L product:</u> 17 mL/100L</p>

Critical Use Comments:

- Monitor orchards for beetles as fruit approach maturity and become susceptible to attack. Apply before beetles reach damaging levels.
- Apply in sufficient water to ensure thorough coverage to the point of run-off.
- Cultural control methods (e.g. destruction of fallen fruit by mulching) should be used to prevent excessive build up of beetles.
- Allow a minimum retreatment interval of 10 days between sprays.
- DO NOT apply more than 2 applications per season.
- DO NOT re-enter treated field/crop until spray deposits have dried, unless wearing suitable protective clothing (i.e. waterproof hat, overalls, boots and gloves). Clothing should be laundered after each day of use.

- DO NOT contaminate streams, rivers, wetlands or watercourses with this product or the used container.
- DO NOT spray any plants in flower while bees are foraging. Spray in the early morning when bees are not actively foraging.

Withholding Period:

Harvest: DO NOT HARVEST FOR 1 DAY AFTER APPLICATION.

Jurisdiction:

ALL States except Vic.

Note: Victoria is not included in this permit because their 'control-of-use' legislation means that a permit is not required to legalise this off-label use in VIC.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

EXPORT OF TREATED PRODUCE: Growers should note that maximum residue limits (MRLs) or import tolerances may not exist in all markets for cherries treated with bifenthrin. If you are growing cherries for export, please check with your industry body for the latest information on MRLs and import tolerances before using bifenthrin.

Issued by Australian Pesticides and Veterinary Medicines Authority.

Note: 21 August 2018; expiry date extended to 31 October 2020 and permit holder details updated. Permit changed from Emergency Use to Minor Use permit. Permit issued as Version 2.

18 December 2018; expiry date extended to 31 December 2023. Additional products (of different concentrations) added to permit. Critical use comments updated to reflect product labels. 'Export of treated produce' statement added. Permit issued as Version 3.
