**Critical Use Comments:**

- Apply as a foliar spray only using boom spray.
- Apply as required when conditions favour disease development.
- Use a sprayer suitable for applying sufficient water to ensure thorough coverage of the crop.
- Apply up to 5 applications per crop with a 7-14 days minimum re-treatment interval.
- Spray volume required may be in the range of 200 to 450 L per hectare, depending on crop foliage area and the crop's within-row and between row spacings.

**Withholding Period:**

Harvest: DO NOT harvest for 1 day after application.

Grazing: DO NOT graze or cut for stock feed.

**Jurisdiction:**

All States except VIC.

(Note: Victoria is not included in this permit because their 'control-of-use' legislation means that a permit is not required to legalise this off-label use in Victoria).

**Additional Conditions:**

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

**TO AVOID CROP DAMAGE:**

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.
