

**PERMIT TO ALLOW EMERGENCY USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF GREEN PEACH APHIDS IN BLACKBERRIES**

PERMIT NUMBER – PER87439

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 4 DECEMBER 2018 TO 31 DECEMBER 2021.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

APPARENT PIRIMICARB 500 WG APHICIDE (68400)

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/kg PIRIMICARB as their only active constituent.

NUFARM TALLY 800WG APHICIDE (69374)

PLUS OTHER REGISTERED PRODUCTS

Containing: 800 g/kg PIRIMICARB as their only active constituent.

Directions for Use:

Crop	Pest	Rate
BLACKBERRIES	Green peach aphid (<i>Myzus persicae</i>)	<u>500 g/kg product</u> 35 g product / 100 L
Field and protected grown crops		<u>800 g/kg product</u> 22 g product / 100 L

Critical Use Comments:

- Apply as a foliar application by ground-based air blaster, boom sprayer or equivalent only. DO NOT apply by back or knapsack sprayer.
- Apply a spray volume up to 900L/ha. Ensure complete and thorough coverage of foliage.
- Monitor crops and apply pirimicarb when local aphid thresholds are reached.
- Minimum re-treatment interval is 10 -14 days.
- DO NOT make more than 2 applications per year.
- DO NOT make consecutive application without rotating with another insecticide from a different mode of action.
- Follow the 'Insecticide Resistance Warning' and the 'Resistance Management Strategy' for green peach aphid and use within an integrated pest management strategy. Apply product to coincide with a susceptible life stage (adults and nymphs).

Withholding Period:

Harvest: DO NOT harvest for 7 DAYS after application.

Jurisdiction:

TAS only.

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the Details and Conditions of this permit.

Re-entry Period

Do not enter treated areas until the spray has dried, unless wearing the personal protective equipment listed in the safety directions.

Resistance Management – Green peach aphid

Green peach aphid (*Myzus persicae*) is a major pest, is known to exhibit carbamate resistance [including pirimicarb] and resistant strains are unlikely to be controlled when using insecticide products with an active ingredient based on this chemical group. Where green peach aphid is identified as the predominant pest species, the use of an aphicide with a different (chemical) mode of action is recommended.

To Avoid Crop Damage

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.

Export of Produce

To allow treated produce to be supplied or otherwise made available for human consumption a Temporary Maximum Residue Limit (TMRL) has been established for Pirimicarb covering the commodity Blackberries at T2 mg/kg. This TMRL applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority
