Critical Use Comments:

- Regularly scout crops to monitor for eggs and larvae. Treat when pests appear, targeting eggs at hatch or small larvae (prior to third instar stage) before the pest becomes entrenched.

- DO NOT apply more than the maximum number of applications, consecutive treatments and retreatment intervals per crop as listed on the product label.
- Coragen - A maximum of 3 applications are to be applied to any one crop. No more than 2 consecutive sprays per crop, with a minimum interval of 7 days (unless otherwise stated on label). Further treatments should be made with alternative mode of action insecticides.
- Refer to the Insecticide Resistance Management (IRM) on the product labels to prevent or delay the development of insecticide resistance to Group 28's including Chlorantraniliprole.

Withholding Period:

Follow the withholding periods for each crop on the relevant product label.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Export of treated produce

MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.
