

Parsley Agrichemical Regulatory Risk Assessment

March 2024

Regulatory pressures on agrichemicals are increasing globally, with many being either restricted or withdrawn from use. For older agrichemicals these pressures are often the result of reconsiderations involving new or refined risk assessment methodologies that requiring the generation of new data. A consequence of which can be that many of these agrichemicals are not meeting contemporary risk assessment standards as the necessary data is unavailable, or where data is available, the risk posed is considered unacceptable.

The use of agrichemicals can also be impacted through differences in standards between trading partners. The lack of an appropriate pesticide maximum residue limit (MRL) in an importing country can, for practical purposes, effectively prohibit use in the exporting country so as to ensure compliance, as a MRL breach would adversely affect market access.

The effects of the above are greater regulatory pressure placed on the use of individual agrichemicals or chemical groups. As a consequence, it is possible that the number of approved agrichemical options could be adversely impacted.

To assist strategic planning, with respect to future pest management options, the following tables have been developed to highlight the regulatory threats to agrichemicals currently approved for the management of the pests and diseases in parsley as well as current initiatives aimed at addressing identified pest management deficiencies

Parsley Agrichemical Regulatory Risk Assessment

R1	Short-term: Critical concern over retaining access
R2	Medium-term: Maintaining access of significant concern
R3	Long-term: Potential issues associated with use - Monitoring required

Active Constituents	Chemical Group	Problem	Comments
Afidopyropen	9D	Cabbage aphid	EU/UK: No authorisations in place
		Cotton aphid	
		Currant lettuce aphid	
		Green peach aphid	
		Silverleaf (Poinsettia) whitefly	
Alpha-cypermethrin	3A	Plague thrips (PER89977)	EU/UK: No authorisations in place
		Rutherglen bug (PER89977)	
<i>Bacillus thuringiensis</i>	11A	Armyworm	EU: Under review for authorisation renewal
		Diamondback (Cabbage) moth	
		Helicoverpa	
		Lightbrown apple moth	
		Looper caterpillars	
Chlorpyrifos	1B	Vegetable weevil(PER14583)	APVMA: Proposed deletion of uses Codex: All MRLs revoked Canada: Cancellation of all uses. EU/UK: No authorisation in place USA: EPA decision to cancel use on food crops
Diazinon	1B	Onion seedling maggot (PER82551)	APVMA: Proposed deletion of uses EU/UK: No authorisation in place Codex: Codex MRLs deleted
Fonicamid	29	Thrips (Suppression – PER89185)	
Flubendiamide	28	Cluster caterpillar	EU: Authorisation expires August 2024
		Diamondback (Cabbage) moth	
		Helicoverpa
