

Monthly wholesale market price report

Celery

February, 2019

This report profiles the following wholesale price metrics:

- *Celery national average wholesale price per kg*
- *Celery average wholesale price per kg by state market*
- *Celery national 15kg carton wholesale price.*
- *Celery market average \$/kg originating from Victoria.*
- *Celery average wholesale price per kg by state market by origin*

Unless otherwise specified, this report averages celery prices across the following metrics:

State of Production

Pack size: 15kg carton

How to use

Overview

This report profiles wholesale market price data and insight for key vegetables categories. The reports draw on monthly market price data collected by Ausmarket Consultants. The data has been analysed by Freshlogic to enable price reporting across key metrics, including national and state markets, product line(s), and origin.

Price per kg

Calculated to enable consistent and comparable price movements over time.

The method combines the prices for the common high-volume lines in each state market. The national average price has been calculated by weighting the state prices by the population distribution.

Price patterns over time

The monthly price reports demonstrate the long term seasonal price movements over the previous two years. Price movements between product lines and markets are reported on. In addition to the average prices, the high and low prices are presented to understand price variability.

Three-month price forecasts

A forecast for the wholesale prices for the next three months has been developed and included. This time period is relevant because it is the production time for most vegetables, similar to the recovery time after climate event disruptions, and also the timeframe for seasonal demand. The forecast is indicated on the charts with a dotted line. The forecasts draws on the monthly prices in the previous ten years, their movements and seasonal patterns, with additional weighted consideration given to the previous three months to capture current market conditions. The forecasts are based on the best available information. They assume supply is not disrupted and demand reflects the immediate historical patterns.

How to use these reports

These price reports are designed to provide vegetable levy payers with a value-added resource to understand short and long-term wholesale market price patterns between markets and product lines. These reports utilise Freshlogic analysis of market prices recorded by Ausmarket Consultants. The market prices are determined based on independent daily market interviews of wholesalers and buyers in each wholesale market. The reports focus on market price reporting for general informational purposes. They are not intended to provide information on the actual price received by your wholesaler for your product; this is a business-to-business engagement and should be managed accordingly.

Monthly wholesale market price reports (VG16084)

This project has been funded by Hort Innovation, using the vegetable research and development levy and contributions from the Australian Government. Hort Innovation is the grower-owned, not-for-profit research and development corporation for Australian horticulture.

Celery national average \$/kg

Monthly prices: last 3-year average, current 9-months & 3-month forecast

Celery BRS & MEL market average \$/kg

Monthly prices: last 3-year average, current 9-months & 3-month forecast

Celery SYD & ADL market average \$/kg

Monthly prices: last 3-year average, current 9-months & 3-month forecast

	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May
3-Year avg	\$1.05	\$1.20	\$1.35	\$1.09	\$0.98	\$1.21	\$1.12	\$0.96	\$1.09	\$1.14	\$1.13	\$1.07
