PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT FOR SUPPRESSION OF ANNUAL RYEGRASS IN ONIONS

PERMIT NUMBER – PER89991

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 5 FEBRUARY 2021 TO 31 OCTOBER 2029

Permit Holder:
HORTICULTURE INNOVATION AUSTRALIA LTD
Level 15, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:
Persons generally.

CONDITIONS OF USE

Products to be used:
OUTLOOK HERBICIDE (APVMA No. 65695)
PLUS OTHER REGISTERED PRODUCTS
Containing: 720 g/L DIMETHENAMID-P as the only active constituent.

RESTRAINT:
DO NOT apply by aircraft.
Follow all restraints, including spray drift restraints, on the product label.

Directions for Use:

Crop	Pest / Disease	Rate
Onions	Suppression of Annual ryegrass (*Lolium rigidum*)	0.65 – 1 L/ha

Critical Use Comments:
- Apply post-crop emergence. Apply between 2 and 4 leaf stage of onions.
- Apply by ground boomspray or equivalent equipment.
- Use a spray volume of 250 – 300 L/ha.
- DO NOT apply more than 1 application per crop.
- This permit is for suppression of low weed populations only. Avoid use on dense annual ryegrass populations.
- To avoid crop damage, use the lower rate on light textured, low organic matter, low CEC soils and the higher rate on heaver textures soils, as per the tables on the registered product label.
- Dimethenamid-P must be used as part of an annual ryegrass integrated weed management program that includes use of herbicides with alternative modes of action and other practices such as mechanical cultivation and crop rotation.

Re-Entry:
DO NOT allow entry into treated areas until the spray has dried unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each days use.

Withholding Period:
Harvest: Not required when used as required.
Grazing: DO NOT graze or cut for stock food, including any part of a failed crop.

Jurisdiction:
All States and Territories, except VIC.
Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:
This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section

To Avoid Crop Damage
The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce
Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. A TMRL has been established for DIMETHENAMID-P in ONIONS, BULB. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Amendment Instrument (No. 1) 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority
25/01/2024 - Permit updated to add s161 condition. Permit expiry extended to 31/01/2027. Permit issued as Version 2.
14/10/2026 – Permit expiry extended to 31/10/2029. Permit issued as Version 3.
